what is
BITCOIN?

what is
**CRYPTO?
CURRENCY?**

3 Things
to learn from Warren Buffet

Bitcoin is a new currency that was created in 2009 by an unknown person using the alias Satoshi Nakamoto.

Bitcoin can be used to book hotels on Expedia, shop for furniture on Overstock and buy Xbox games. But much of the hype is about getting rich by trading it.

Transactions are made with no middlemen – meaning, no banks!

The price of bitcoin skyrocketed into the thousands in 2017.

what is
**BINANCE
COIN?**

Changpeng Zhao, colloquially known as 'CZ', was the CTO at OKCoin before leaving to start Binance in 2017 and launched in July 2017

By January 2018, just six months later, it became the world's largest cryptocurrency exchange by trading volume.

CZ appeared on the front cover of Forbes magazine in an interview about the world's fastest-growing unicorn startup. Binance was estimated to be worth nearly \$2 billion after one year of launch.

In total, Binance processes an average of \$2 billion in trading volume, every 24 hours. Moreover, it can handle up to 1.4 million transactions per second (TPS).
